

THE EXPERTS IN MOLD & MOISTURE MANAGEMENT

About ESP:

Since 1994, Environmental Service Professionals, Inc. ("ESP") a California-based, Nevada Corporation, through its various acquisitions has offered environmental services for addressing Mold and Moisture Intrusion and the associated acute or chronic issues that impact the Interior Air Quality of commercial and residential buildings.

ESP has evolved and has focused on developing and delivering state-of-the-art, "Best in Class" procedures, tools and education to provide services for addressing moisture and mold related and other environmental issues (e.g.: Energy, Radon & Allergy testing) for the residential and commercial real estate industries.

ESP is the first Company of its kind to be able to support a pro-active comprehensive annual inspection called the Mold and Moisture Management Program (MMM). This Program is available for all residential properties that have passed ESP's Certified Mold and Moisture Inspection Process (CMI).

ESP's acquisition of 7 of the real estate industry's most recognized associations has provided the access to train and provide its members who are at the core of the industry with information that is consistent with our approach.

2013 - \$7.90B

ESP's state-of-the-art, "Best in Class" procedures, tools and education bring a real opportunity to provide a standardized pro-active approach to the highly fragmented and relatively unsophisticated inspection industry. ESP is enhancing its position as the leader of this new industry through acquisitions.

Mission Statement

ESP will invest its time and resources in developing and delivering state-of-the-art procedures and tools to provide environmental services for addressing many environmental issues in the Building, Residential, Commercial and Real Estate Industries

ESP has developed a holding company structure that has set the stage to acquire other independent owner operations in the Home Inspection, Mold Inspection, moisture related associations and environmental energy industries throughout the United States and Canada

ESP will provide its staff, members and business units with world-class education in the techniques and ethics of delivering such services to the public and continue to develop the tools technologies and processes to effectively deliver these services

ESP will bring "Peace of Mind" to every interaction

ESP has delivered proven Inspection Programs within a business model that offers significant profit, coupled with its intent to lead the Industry. ESP Program participants are provided with all the tools that they need for success. ESP provides an easy to follow operations manual, complete sales program and we provide extensive training coupled with easily accessible Hygienist Services. ESP continues to be unique in client service through an established Customer Service Center and on-line scheduling.

Standardized, Proprietary & Scalable Services:

Consistent with the market positioning established in ESP's initial White Paper and subsequently amended in November 2007; ESP has developed a Program that consists of a suite of services when used together comprise "**The Industry's Best in Class Inspection**".

The branding of this Program is ESP's Certified Environmental Home Inspector ("**CEHI**") and will be operated under the Environmental Safeguard Professionals Business Unit.

The CEHI Program represents the keystone for environmental services supporting the residential real-estate mortgage, banking and insurance industries in their ability to manage losses through moisture related claims.

This Program also will play a significant role in managing the health and indoor air quality of the environments where people work and live.

The CEHI Program is all about **risk management** for both the individual and the industry stakeholders. It is a significant tool to assess the health the individual's environment; For the Industry, it provides an easily understood, standardized way of assessing the risks of their policies, regardless of location.

ESP's Anchor Services	
➤ CEHI Certification	➤ Certified Moisture Inspection (CMI)
➤ Annual Mold and Moisture Management Program (MMM)	➤ New Builder Moisture Management Program (NBMM)
➤ Energy Inspections	➤ Allergen Screening
➤ Radon	➤ Abridged Phase I Environmental Reports

Key Competitive Advantages

ESP has developed a combination of standardized proprietary processes for each aspect of the client account from initial call, to the dispatch, through completion of every inspection.

In an effort to ensure profitability, the Company has standardized each of its processes and has documented a standardized training program, which all employees/contractors must pass. New CEHI's are required to learn the Company's processes, while developing working relationships with administrative personal at HQ under simulated, low-stress conditions. Teamwork is built by fostering an understanding of all aspects of the business.

Key Internal Program Features
➤ Standardized Training
➤ Standardized Certification Process
➤ Standardized Inspection & Report Process
➤ Standardized Result Analysis
➤ Proprietary dispatch process
➤ Scripted needs assessment
➤ Standardized rate card
➤ Database driven trends analysis
➤ Scalable CEHI support systems

Standardized processes and training create a community among all Company team members, ensuring dedication to common goals of high quality and efficiency

Market Focus (Diversified across Three Customer Segments):

1. Residential: The residential market is the target market, and the largest and most profitable for ESP. It represents homeowners contracting for inspections and demonstrates high same-day close rates.
2. Multi-Unit: This market represents condominium homeowner associations (HOAs) contracting for maintenance services.
3. Commercial: In this market segment, service calls are used to create a maintenance budget. These are larger contracts and have longer sales cycles.

Diversification over several market segments stabilizes utilization levels during lulls in the target market.

Attractive Cash Flow & Less than a 30-day collection cycle

The ESP business has exceptional financial characteristics. ESP competes in a massive market and has already proven the viability of its business model, demonstrating the effectiveness of the independent contractor model, on-line management, and a centralized call center. The Business has outstanding margins, an extremely attractive cash collection cycle.

Additional Potential Revenue Steams

ESP has identified complimentary revenue streams that would further support the success of our business model. Given the Company's extensive client database, its long-term client relationships and its business relationship with a client's most valued asset their home, ESP Management believes in building a powerful asset through our inspection reporting database:

- For each house or building on an Annual Mold and Moisture Management (MMM) Program, there will be a history of inspections, remediation, repairs and maintenance.
- This information could be highly valuable to Mortgage and Insurance Underwriters, since it could mitigate their risk.

The current sub-prime crisis provides another realistic avenue for revenue for ESP. City & Local governments are beginning to enforce by-laws on the holders of repossessed real estate. This quite simply means the maintenance of the property is now the obligation of the entity who has repossessed it. ESP could adapt and repackage its core services into an inspection program for the financial institutions to assist in ensuring the value of these properties.

Near Term Expansion Strategy

Beginning in 2008, ESP will educate and bring full awareness to the following Industry Stakeholders.

- **The Insurance Industry**

Initiative: establish a "Good Consumer Discount" for Annual Inspections by a CEHI.

Goal: decreased risk, decreased claims, and reduced liability.

- **The Mortgage Banking Industry**

Initiative: promote benefits of a 10 year Annual Inspection Program with each mortgage. Offer discounts on these mortgages.

Goal: mitigation of risk for the mortgage holder and provide reduced costs for the consumer

- **The Building Industry**

Initiative: provide Annual Inspection Program minimizing liability through the 3rd party inspection process.

Goal: reduce uncertainty and liability for claims.

- **The Real Estate Industry**

Initiative: teach CMI inspection protocols & benefits of Annual Inspection Program including full disclosure of the property conditions.

Goal: assurance in an area that has been previously unknown in property sales.

- **The Consumer**

Initiative: educate the consumer regarding the benefits of an Annual Inspection Program.

Goal: "Peace of Mind" for consumers, their families, their health and their homes.
